# What should I do?

### I tested positive for COVID-19

Positive test result

Self-isolate for 5 days from test date or first date of symptoms regardless of vaccination status.

If you have no symptoms or your symptoms subside after 5 days, AND you have not had a fever in 24 hours, you may come out of self-isolation after 5 days.

Continue to wear a mask around others for 5 additional days.

Positive test or develop symptoms (Jan 5th) → Self-isolate 5 days → No symptoms or symptoms subside (Jan 10th) → Wear mask for 5 additional days

If your symptoms persist for more than 10 days, contact your primary care provider.
