The physical demands described herein are representative of those that must be met by an employee to successfully perform the essential functions of the job. Reasonable accommodations may be made enable individuals with disabilities to perform the essential functions.

Mobility to work in a typical office setting and use standard office equipment; stamina to sit for extended periods of time; strength and agility to lift and carry up to 20 pounds; vision to read printed materials and a computer screen, and hearing and speech to communicate in over the telephone and in person.

ESSENTIAL FUNCTIONS:

- Installation and Configuration: Install, splice, terminate, and test fiber optic cables for both new installations and upgrades to existing networks.
- Maintenance and Repair: Diagnose, troubleshoot, and repair issues with fiber optic networks, ensuring minimal downtime and optimal performance.
- Testing and Certification: Perform testing using optical time-domain reflectometers (OTDR) and other testing equipment to certify the integrity and performance of fiber optic systems.
- Monitoring: Monitoring Network Connectivity from the Network Operations Center.
- Documentation: Maintain accurate records of installations, repairs, and testing results. Document network configurations and update technical diagrams as necessary.
- Customer Service: Interact with clients to understand their needs, provide technical support, and ensure customer satisfaction.
- Safety Compliance: Follow all safety protocols and guidelines to ensure a safe working environment. Adhere to industry standards and local regulations.
- Team Collaboration: Work closely with other technicians, engineers, and project managers to complete projects on time and within budget.
- Training and Development: Stay updated on the latest fiber optic technologies and best practices. Participate in ongoing training and development opportunities.
- Digital Navigator: Provide services and education to community on electronic devices installed in homes.
- Other duties as assigned.

REQUIRED KNOWLEDGE AND SKILLS:

Knowledge of:

- Knowledge of OTDR and other diagnostic tools.

Skills in:

- Technical Skills: Proficiency with fiber optic splicing, termination, and testing equipment.
- Communication Skills: Excellent verbal and written communication skills. Ability to explain technical concepts to non-technical clients.
- Problem-Solving: Strong analytical and troubleshooting skills. Ability to identify and resolve network issues efficiently.
- Attention to detail: Meticulous attention to detail with a focus on accuracy and quality.
